

Case Study : Bathroom

When turning this unused internal garage into an ensuite for the guest bedroom the main criteria was to retain the existing windows and wooden garage doors. Once restored, the beautiful doors were used to provide a character backdrop to the contemporary free standing bath. The linear aesthetics of the doors were counter-balanced by the clean, horizontal lines of the wall tiles, which wrap round the entire bathroom and can be seen through the glass shower. The wooden freestanding vanity provided both a modern look but was also in keeping with the other wooden features in the room. The result was a clean, fresh, timeless and functional bathroom.
